

Project Unity Intake1 Data Summary Report

9-1-2021 to 8-31-2022

Introduction

The following are narrative summaries of the data from Intake1 presented in table form below. The data included in this report is taken from the Intake1 Assessments and case notes of clients served from September 1, 2021 to August 31, 2022. Data on referrals, services provided, etc. are therefore limited to those that occurred during that time frame.

The data below provides information on a total of 580 households (each with a primary, adult client). These households served had around 1,852 individuals residing in them. Of the 580 households/primary clients served, 348 of them were actively enrolled in Project Unity's HOPES, Family Self Sufficiency and Supports (FSSS), and/or Fresh Start 4 VETS programs. 232 of the households/primary clients were either community walk-ins, former active participants in Project Unity's programs, or participants of the BVCOG's¹ Family Self Sufficiency program whose data was captured as part of Project Unity's FSSS data-sharing pilot program with the BVCOG.

It is important to note that we were not always able to collect every data point from every client. For that reason, some of the percentages mentioned in the narrative below were calculated out of the total number of people included in the report (580), rather than the total who responded. Therefore, the percentages mentioned should be taken to mean "at least" XX.X% of clients exhibited the trait/characteristic described. The tables following the narrative section provide percentages based on the actual number of responses clients provided.

Demographics

Clients served by Project Unity from September 1, 2021 to August 31, 2022 were primarily women (81.3%) of color (80.9%) (50.3% of whom identified as Black and 25.9% of whom identified as Hispanic or Latino). Most clients were not married (86.7%). The average client age was 35.5 years, and ages ranged from 17 to 84 years old. Most clients spoke English in their household (90.8%), and most were neither disabled (88.2%) nor military veterans (82.3%). Clients resided mostly in the cities of Bryan and College Station, TX (91.7%) and were from the following Zip Codes (88%): 77803, 77840, 77801, 77802, 77807, and 77845.

Household

A majority of clients' households were female-headed households (67.8%). Households had an average of 1.9 kids. Most clients were the only adults in their household (72%) (including situations where children over 18 continue to reside with their parents).

¹ Brazos Valley Council of Governments

Employment

Over half of the clients served were unemployed (52.1%). Of those who were employed, 62.4% were full-time, and 37.6% were part-time employed. The most common number of hours worked per week for employed clients was 40 hours (51% of the clients who reported hours worked), though the average number of hours worked per week was 33.7 hours and responses ranged from 5 to 90 hours.

In terms of employers, over half of clients who reported an employer reported being employed by health care/home health care providers, educational institutions (Texas A&M University, BISD, CISD), and/or restaurants/food service companies (51.1%).

Regarding types of employment, almost half of clients reported being employed or having previously been employed in roles related to Healthcare/Care Giving, Customer Service/Retail/Sales, Cooking/Food Service, Cashier/Gas Station Work, Facilities Maintenance/Janitor, or Cleaning/Housekeeping (46%).

Over half of clients had held a job for a year or more (66.7%). A majority of clients reported that they were not receiving benefits from employment (77.4%), and almost half of clients reported they did not feel they had the training they needed to get the type of job they desired (42.1%). Of those who reported whether or not they were satisfied with their job, over a quarter said they were not satisfied with their job (36.2%).

Income

The median annualized income of clients served was \$11,268.00 and incomes ranged from \$0 to \$288,000.

When considering family size, most clients (94.1%) had incomes that were extremely low to low based on HUD Income limits. 81.7% of clients reported incomes that were at or below fifty percent of the median family income for Brazos County.

Benefits

The most common benefits that clients reported receiving were Food Stamps (at least 57.4%), Medicaid (at least 55.7%), and HUD (at least 49.7%).

Clients mostly did not receive: CHIP (at least 81.4% not receiving), SSDI (at least 80.5% not receiving), Subsidized Child Care (at least 79.5% not receiving), SSI (at least 76.4% not receiving), Child Support (at least 67.6% not receiving), WIC (at least 62.4% not receiving), or Free or Reduced Lunch (at least 50% not receiving).

Education

(Clients)

Clients were mostly educated in the US (89%). At least 9.7% of clients said they had been diagnosed with a learning disability, and at least 11.2% of clients reported having a hard time reading.

Over a quarter of clients did not complete school through the 12th grade (27.1%), and 20.3% of clients said they neither had nor were working toward a high school diploma or GED. Of those who did complete high school, at least 62.9% graduated with a high school diploma and at least 10.9% completed a GED.

In terms of post-secondary education, at least 17.4% of clients reported they either had or were working towards an Associate's or Bachelor's degree. At least 24.5% of clients indicated they had "some" post-secondary education. Nevertheless, almost three-quarters of the clients reported they neither had nor were currently working toward a post-secondary degree (74%).

At least 12.9% of clients said they were currently enrolled in secondary or post-secondary education. Clients who were enrolled in school were mostly studying at Blinn College (at least 48.2% of those enrolled in school).

(Clients' Children)

At least 16.9% of clients said they had children diagnosed with a learning disability, and 14.8% of clients reported that their children had received special education services. Over half of clients with children under 5 years old said they had considered Head Start (65.4%). At least 8.3% of parents reported that their children were not attending school regularly, and at least 10.7% of parents reported non-typical child development.

Child Care

At least 22.9% of clients with children reported they needed child care. The most common time during which child care was needed was during work (at least 13.4% of clients with children). The most common problem with child care that clients identified was that the care was too expensive (21.8% of clients with children).

Transportation

At least 14.7% of clients reported they did not have adequate transportation, and slightly over a quarter reported they did not own their own vehicle (at least 26.9%). A majority of clients, however, did own their own vehicle (61.7%). Of those vehicle-owners, 9.2% of clients reported their vehicle was "not very reliable" or "not reliable at all," while 90.8% of clients reported their vehicle was either "very reliable" or "somewhat reliable."

10.2% of clients reported that there was no public transportation available where they lived. Of the 77.6% of clients who did have access to public transportation, 5% said that the transportation was “not convenient at all.” The most common response from clients was that they “did not use [public transportation] enough to have an opinion” (41.9% of clients), though 34% of clients indicated that public transportation was either “very convenient” or “somewhat convenient.”

Medical

Almost half of clients did not have health coverage (43.3%), and over a quarter did not have a medical home (30.3%). Most clients’ children, however, did have health coverage (at least 70% of clients with children) and did have a medical home (at least 67.4% of clients with children). Almost half of clients (42.8%) reported they use the emergency room when they or a family member gets sick, and at least 44.5% of clients had used the emergency room for a non-life-threatening illness 1 or more times in the past year.

At least 7.6% of clients reported they needed help paying for prescriptions, and at least 20.3% of clients reported having a member of the household that had been diagnosed with a medical disability.

At least 2.4% of clients with children did not have their children’s vaccinations up-to-date. The most common illnesses that clients identified were asthma (at least 20.5%) and high blood pressure (at least 14.5%). The most common medical needs identified by clients were dental screenings (at least 23.6%) and family counseling (at least 13.4%). Almost a quarter of clients indicated they did not know how to access mental health services (21.2%).

At least 21.4% of clients had been diagnosed with Depression, and at least 19.1% of clients had been diagnosed with Anxiety. Around 4%-7% of clients indicated they had been diagnosed with Bi-Polar Disorder, Substance Abuse, and/or Schizophrenia, respectively. Additionally, almost 5% of clients indicated that they had been diagnosed with Post-Traumatic Stress Disorder (PTSD) (4.7%).

Nutrition

At least 7.6% of clients said they did not have enough food to eat, and at least 12.6% of clients said they had gone hungry 1 or more times in the past 6 months. Additionally, almost a quarter of clients said they had relied on food pantries or donations 1 or more times in the last six months (at least 22.8%) with 20 clients saying they relied on this assistance “All the time.”

Housing

Most clients rented their home (78.4%). Additionally, the average utility cost for clients was \$179.72 and utility costs ranged from \$0 to \$650 per month.

At least 17.8% of clients indicated they did not have a stable living situation, and at least 4.1% of clients said their living conditions were not safe.

Though a majority of clients had never been evicted (81.4%), at least 5.5% of clients said they had been evicted 1 or more times in the past year, and at least 21.2% of clients indicated they had to double up with a friend or family member 1 or more times in the past year. Lastly, at least 12.2% of clients had had their utilities cut off 1 or more times in the past year.

Criminal History

At least 18.8% of clients had been convicted of a crime. Most of those who had been convicted of a crime only had misdemeanors (55% of those convicted), while 33.9% of those convicted had both misdemeanors and felonies and 11.9% only had felonies.

Family Stability

At least 10.2% of clients said they did not have people they could call on for help/support. Though there were many strengths identified by clients, the most common were “faith” (173 times), “hope” (85 times), “caring for each other” (66 times), and “dependability” (66 times). In terms of stressors, the most common responses were “financial” (289 times) “basic needs” (161 times), and “housing” (133 times).

Referrals

Clients were referred to Project Unity 81 times from 30 different partner agencies, organizations, and/or programs. Project Unity also made 939 referrals to 119 different partner agencies, organizations, and/or programs.

Requests

Clients served by Project Unity made 1,233 requests for services including food, transportation, utility, and housing (usually rent) assistance.

Services Provided and Funding Streams Used

Project Unity’s staff provided services including parenting classes, food, and transportation assistance on at least 2,599 occasions. In providing these services, Project Unity leveraged funding from 11 sources other than PEI², Homeless Veterans Reintegration Program, and Texas Workforce Commission on 1,115 occasions. This means that at least 42.9% of reported services were provided using leveraged-funding.

National Performance Indicators

Project Unity’s clients achieved National Performance Indicator outcomes 3,826 times. Outcomes included improved parenting/family functioning skills, receiving food, and receiving family maintenance assistance.

² Prevention and Early Intervention division of the Texas Department of Family and Protective Services

National Performance Indicators (NPIs)

The NPIs in Intake1 are based on the performance indicators for the federal Community Service Block Grant program. This program seeks to reduce poverty, revitalize low-income communities, and empower low-income families and individuals to become fully self-sufficient. By incorporating these indicators, Intake1 adds a poverty-reduction framework to its reporting of client outcomes. Here are the NPIs that were achieved by clients and the number of times each one was achieved.

NPIs (duplicated):

Item	Count	Percentage
6.3.C.1: Parent/other adults learned and exhibited improved parenting skills	1479	38.7%
